#### **ECIL receives INS Industrial Excellence Award**

Electronics Corporation of India Limited (ECIL), a Government of India Enterprise under Department of Atomic Energy has been awarded the prestigious Indian Nuclear Society (INS) Industrial Excellence Award for the year 2013 in recognition of its consistent outstanding contribution in the Nuclear field through innovative technological and management approaches.

Shri P Sudhakar, Chairman and Managing Director of ECIL received the INS award from Prof P Rama Rao, Chairman, Board of Research in Nuclear Sciences at the inaugural function of 25<sup>th</sup> Annual conference of INS held in Hyderabad today i.e. 15<sup>th</sup> December 2014. The Society appreciated the strong indigenous technology base ECIL has built in Control and Instrumentation (C&I) with footprints across the entire Nuclear Fuel Cycle, starting from prospecting to waste immobilization.

: 2 :

Indian Nuclear Society in its citation said that ever since its inception in 1967, ECIL has ably supported India's nuclear program through years of technology denials, embargos, obsolescence cycles and refurbishment campaigns. In the process ECIL has evolved into a fully integrated Nuclear C&I company and has successfully developed, absorbed and productionized generations of technologies. All the indigenously built Nuclear Power Plants across the country are operating with the vital Instrumentation and Control systems designed and manufactured by ECIL.

The society has also appreciated the contributions of ECIL in preventing the illegal flow of nuclear materials by installing Radiation Detection Equipment at seaports.
